

Pest Control

Technical Training Solutions
delivered by

Course Summary

This 1 day training is delivered by trainers who have experience in the subject and will be able to engage in discussion and shown best practice with delegates. The course has been designed to be interactive, combining group exercises, open discussions and a clear transfer of information. The workshop will be run in a relaxed and informal style. The workshop is not designed to measure delegates presentation skills or pre-course knowledge.

Course Detail

Food Safety Management is fundamental to consumer protection and Tesco's reputation. It is crucial to the future and success of your business. Pest Control on sites is a major part of this.

The one day course focuses on the basic biology, behaviour, pest control techniques and specific rules and products. the pests covered include; rodents, crawling insects, flying insects, birds and other pests. The course expands on the TFMS requirements for pest control and management of pest control contractors. The training includes a number of group exercises and some practical demonstrations.

Pest Control training is designed to provide more detailed knowledge about the names pests. The training details how to identify pest activity, how to prevent a pest infestation and best practise for dealing with or removing pests.

Pest Control is one of the most common non conformances in TFMS audits and the single most common reason fro critical non conformances.

The course is suitable for all personnel who would benefit from a greater knowledge of pests, their activity and how to control them and those who need to make their own staff aware of the signs of pest activity:

Technical, Engineering, Distribution, Hygiene, Production.

The course is limited to 16 delegates who sit at a 'U'-shaped table plan to promote discussion. The course is relaxed and informal, highly interactive with group exercises and open discussions.

The training is not mandatory.

Tesco believe that the vast majority of our suppliers will benefit from this training and it will help individual development and understanding.

The course fee is **£295 plus VAT** per delegate. All individuals interested in the course should visit www.ttsbookings.com and fill in the on-line booking form for the course you would like to attend.
